

## Online Registration is Open

Kochi Municipal Corporation (KMC), with the support and cooperation of GIZ India, under the “Sustainable Urban Development - Smart Cities” (SUD-SC) project, has launched the ‘EnteKochi-Competition’ - a novel approach to a national-level ‘Urban Design Competition’ (UDC), that aims to jointly ‘design the future city’ of Kochi. The UDC invites implementable ideas that are scalable, inclusive in nature, customised to local needs and multi-sectoral in their approach. The competition invites multi-disciplinary teams of professionals from diverse backgrounds (Social Sciences, Humanities, Ecology & Environmental Sciences, Spatial Planning, Architecture, Urban design and allied fields) to participate.

The top three entries will be engaged on contract with GIZ to further refine their design solutions for effective implementation. They will also get an opportunity to collaborate on this project with technical experts from India and Germany

For more information visit: <https://www.entekochi-competition.org>

Last date of registration: 22 June, 2020
